

MoShine

With a 2:1 in Computer Sciences and an MA in Computer Animation, Satish Shewhorak could expect to land a good job with a reputable company. However, when he and fellow graduates Michael Siu and Steve Caie successfully bid to update the graphics on a cable TV music show, they decided to set up their own business. Now moShine specialises in motion graphics, animation and design and the partners also run their own interdisciplinary arts nights.

They see Unipreneurship as an investment in the highly advanced skills they have learnt as well as a lifestyle choice.
